

SS-TC from Windows 8

Steps to create connection to the SS-TC wi-fi network from Windows 8:

1. Right-click the networking icon in the system tray and click "Open Network and Sharing Center."
2. click or tap "Set up a new connection or network."
3. Select "Manually connect to a wireless network" and click or tap "Next."
4. fill fields with next information
network name - SS-TC
security type - WPA2-Enterprise
encryption type - AES

Provided you entered the information correctly, you'll receive a notice of success.

5. Click on "change connection settings"
6. Go to security
7. Click settings
8. uncheck Verify the server's identify....
9. Click on advanced settings and specify authentication mode User authentication.
10. that's all. You have new wi-fi connection in network list
11. Connect to SS-TC and provide your login and password. For example
login - "usertc"
password - "*****" 😊
