

# SS-TC from Windows 7

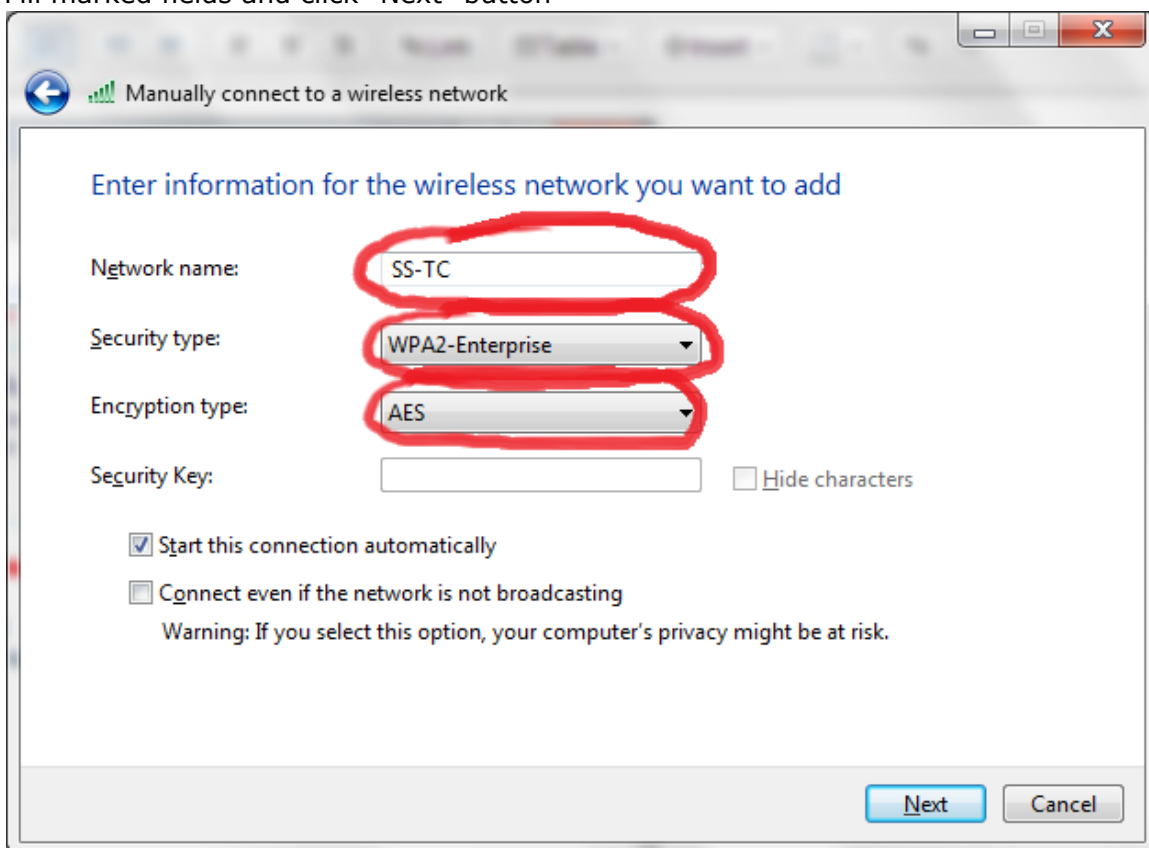

1. Control Panel -> Network and Internet -> Manage Wireless Networks -> Add button

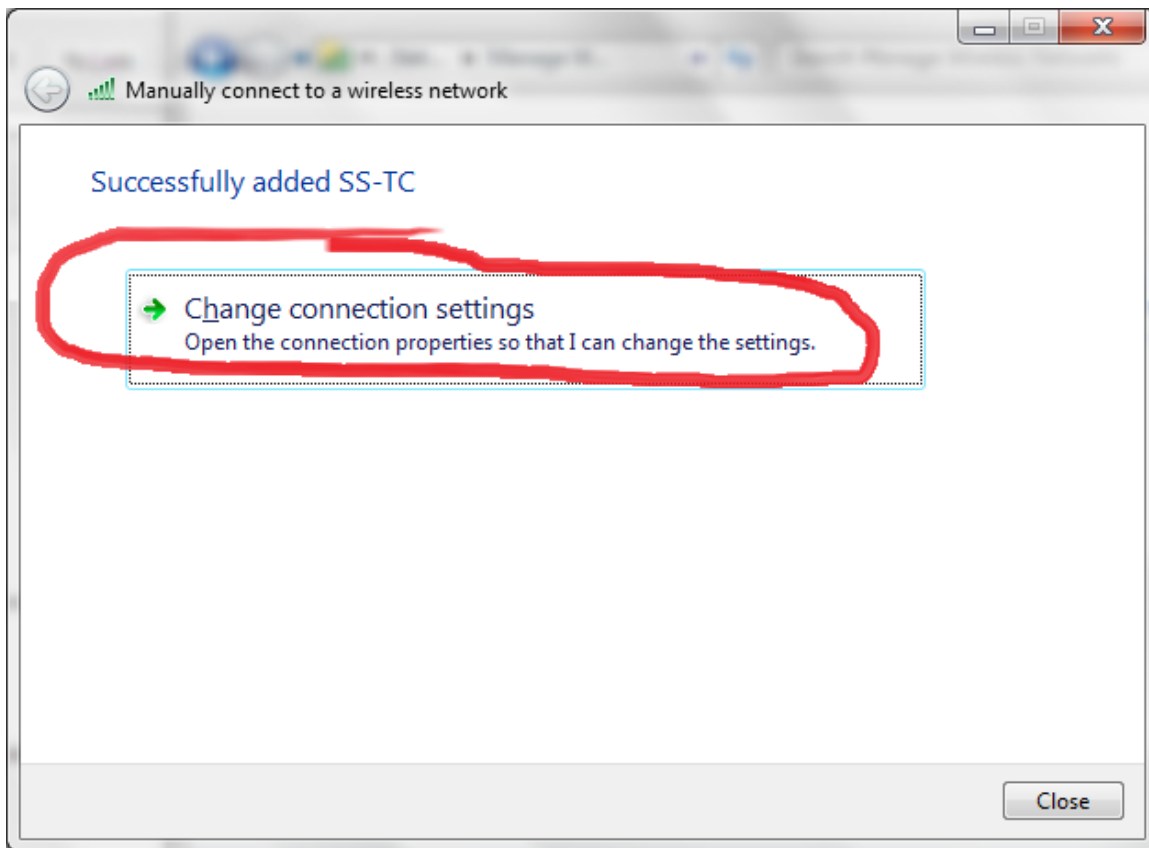

2. Select "Manually create a network profile"

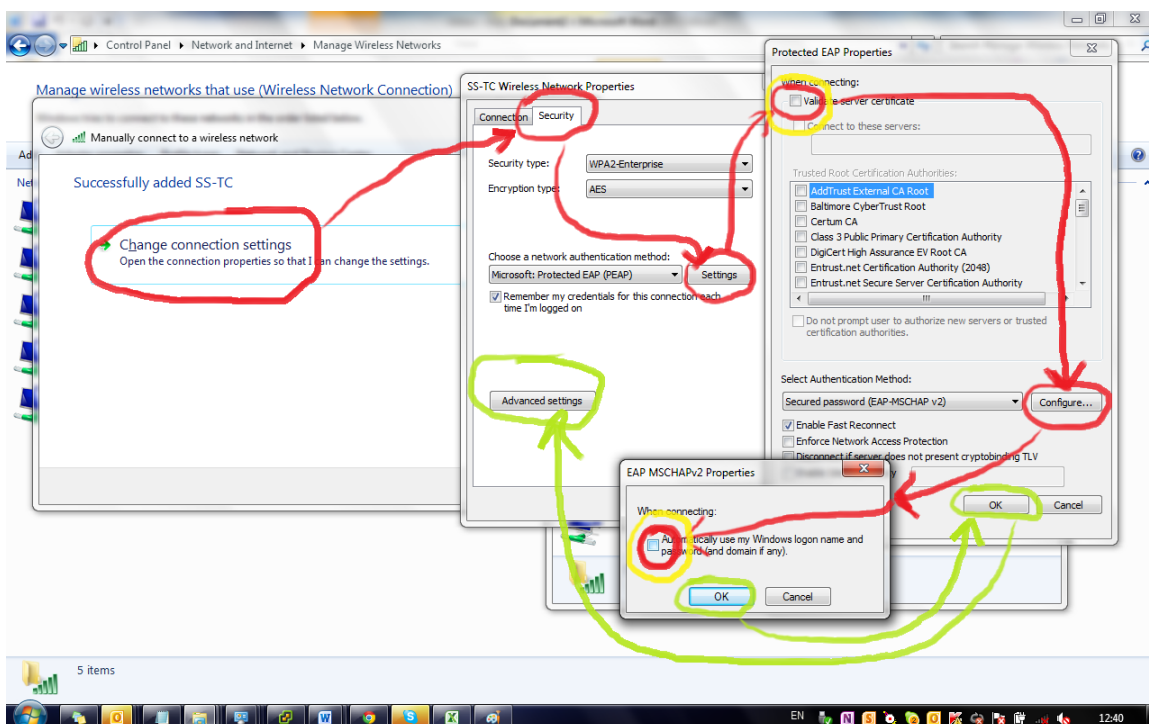

3. Fill marked fields and click "Next" button

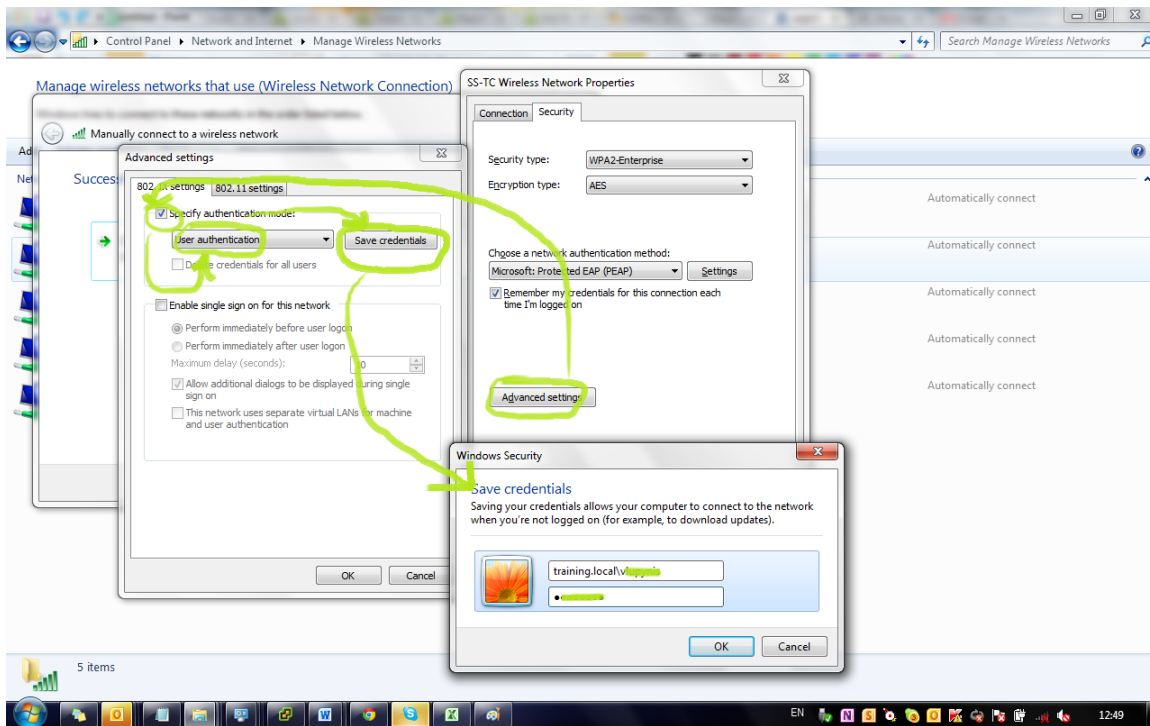

4. Click "Change connection settings"

5. "Security" tab -> "Settings" button -> uncheck "Validate server certificate" -> "Configure" button -> uncheck "Automatically use ...." -> OK -> OK -> "Advanced settings" button

6. "Advanced settings" -> check "Specify authentication mode" -> select "User authentication" -> press "Save credentials" -> type login and password -> OK ...

Thats all!
